

COMMUNITY BENEFIT NARRATIVE

Effective for FY2014 Community Benefit Reporting

Health Services Cost Review Commission

4160 Patterson Avenue Baltimore, MD 21215

December 15, 2014

I. GENERAL HOSPITAL DEMOGRAPHICS AND CHARACTERISTICS

Please <u>list</u> the following information in Table I below. For the purposes of this section, "primary services area" means the Maryland postal ZIP code areas from which the first 60 percent of a hospital's patient discharges originate during the most recent 12 month period available, where the discharges from each ZIP code are ordered from largest to smallest number of discharges. This information will be provided to all hospitals by the HSCRC.

- 2. For purposes of reporting on your community benefit activities, please provide the following information:
 - a. Describe in detail the community or communities the organization serves. (For the purposes of the questions below, this will be considered the hospital's Community Benefit Service Area "CBSA". This service area may differ from your primary service area on page 1.) This information may be copied directly from the section of the CHNA that refers to the description of the Hospital's Community Benefit Community.

Adventist HealthCare Behavioral Health & Wellness Services, Eastern Shore primarily serves residents of Wicomico County, Anne Arundel County, and Dorchester County, Maryland, which together account for 68 percent of patient discharges. Therefore, for the purpose of this report, we will focus on local data from Wicomico, Anne Arundel, and Dorchester Counties. Below, Figure 1 shows the percentages of discharges by

county for Adventist HealthCare Behavioral Health & Wellness Services, Eastern Shore:

| County | Percentage |
|--------------|------------|
| Wicomico | 33% |
| Anne Arundel | 20% |
| Dorchester | 15% |
| Caroline | 6% |
| Worcester | 6% |
| Somerset | 5% |
| Talbot | 4% |
| Queen Anne's | 3% |
| Other | 8% |

Figure 1. Adventist Behavioral Health and Wellness Services Eastern Shore's discharges by county, 2013

Approximately 80 percent of discharges come from our Total Service Area, which is considered Adventist HealthCare Behavioral Health & Wellness Services, Eastern Shore's Community Benefit Service Area "CBSA" (see Figure 2). Within that area, 60 percent of discharges are from the Primary Service Area, including the following ZIP codes/cities:

Cambridge (21613); Salisbury (21804, 21801); Berlin (21811); Princess Anne (21853); Willards (21874); Annapolis (21403); Crofton (21114); Denton (21629); Easton (21601); Fruitland (21826).

We draw 20 percent of discharges from our Secondary Service Area including the following ZIP codes/cities:

Elkton (21921); Annapolis (21401, 21409); Edgewater (21037); Federalsburg (21632); Bivalve (21814); Odenton (21113); Hebron (21830); Laurel (19956); Arnold (21012); Glen Burnie (21061); Baltimore (21202); Crownsville (21032); Davidsonville (21035); Grasonville (21638); Hurlock (21643).

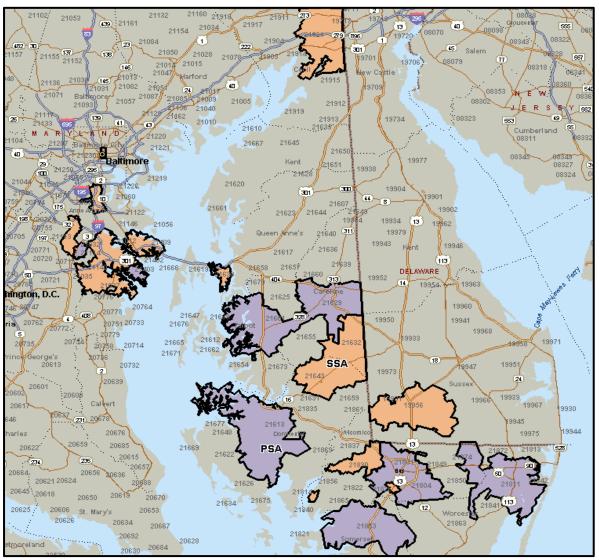

Figure 2. Map of Adventist HealthCare Behavioral Health & Wellness Services, Eastern Shore's Primary Service Area (purple) and Secondary Service Area (orange) based on 2013 inpatient discharges.

Our Community Benefit Service Area (CBSA), covering approximately 80 percent of discharges, includes 518,920 people from the racial/ethnic categories below (see Figure 3).

Population demographics are rapidly changing in the state of Maryland, including among residents living in Wicomico, Anne Arundel, and Dorchester County. Agriculture is Wicomico County's main industry as the state's top agricultural county known for its Perdue farms, while Dorchester County's pristine rivers, marshlands, working boats, quaint waterfront towns and villages of fertile farm fields is known as the *Heart of the Chesapeake Country*. Anne Arundel County also borders the Chesapeake Bay, and is noted for a rich heritage. Over the past decade, the populations of these counties have continued to rise; racial and ethnic diversity is also increasing. The minority population is 34.6 percent in Wicomico County, 34.8 percent in Dorchester County, and 29.1 percent in Anne Arundel County, an increase for each over the last decade (U.S. Census State & County QuickFacts, 2013). Blacks/African Americans comprise the highest percentage of all minority groups at 24.9 percent of the population of Wicomico County, 28.1 percent in Dorchester County, and 16.4 percent in Anne Arundel County (see Table II) (U.S. Census State & County QuickFacts, 2013).

As racial and ethnic minority populations increase, concerns regarding health disparities grow – persistent and well-documented data indicate that racial and ethnic minorities still lag behind nonminority populations in many health outcomes measures. These groups are less likely to receive preventive care to stay healthy and are more likely to suffer from serious illnesses, such as cancer and heart disease.

Further exacerbating the problem is the fact that racial and ethnic minorities often have challenges accessing quality healthcare, either because they lack health insurance or because the communities in which they live are underserved by health professionals. As the proportion of racial and ethnic minority residents continues to grow, it will become even more important for the healthcare system to understand the unique characteristics of these populations in order to meet the health needs of the community as a whole. As a result, this report examines health status and outcomes among different racial and ethnic populations in Wicomico County, Dorchester County, and Anne Arundel County, with the goal of eliminating disparities, achieving health equity, and improving the health of all groups.

In response to the changing demographic characteristics of the communities surrounding their hospitals, Adventist HealthCare – the parent organization of Adventist HealthCare Behavioral Health & Wellness Services, Eastern Shore – has made cultural competence an organizational priority. Cultural competence refers to "a set of congruent behaviors, attitudes, and policies that come together in a system, agency, or among professionals that enables effective work in cross-cultural situations. *Competence* implies having the capacity to function effectively as an individual and an organization within the context of the cultural beliefs, behaviors, and needs presented by consumers and their communities." In essence, cultural competence offers a means to "treat patients the way *they* want to be treated" – it is the actualization of the "platinum rule" guiding how Adventist HealthCare aims to provide care.

b. In Table II, describe significant demographic characteristics and social determinants that are relevant to the needs of the community and include the source of the information in each response. For purposes of this section, social determinants are factors that contribute to a person's current state of health. They may be biological, socioeconomic, psychosocial, behavioral, or social in nature. (Examples: gender, age, alcohol use, income, housing, access to quality health care, education and environment, having or not having health insurance.) (Add rows in the table for other characteristics and determinants as necessary).

Median Household Income within the CBSA

Median Household Income

Wicomico County: \$50,639 Anne Arundel County: \$86,987 Dorchester County: \$46,199

Source: U.S. Census Bureau, State and County Quick Facts, 2008-2012

Due to the specialized services offered, Adventist HealthCare Behavioral Health and Wellness Services Eastern Shore has a widespread and diverse community benefit service area. Among the counties that comprised the majority of discharges in 2013, the median household income ranges from as low as \$46,199 in Dorchester to as high as \$86,987 in Anne Arundel (U.S. Census Bureau, State and County Quick Facts, 2008-2012).

Great income disparities exist when broken down by racial/ethnic groups. Throughout the CBSA served by Adventist HealthCare Behavioral Health & Wellness Services, Eastern Shore, non-Hispanic Whites and Asians have the highest median household incomes among racial and ethnic groups, while Blacks and Hispanics are more likely to live in poverty (see Figure 4) (U.S. Census Bureau, ACS, 2010-2012). White households in Dorchester County had a median household income of \$52,670, white households in Wicomico County had a median household income of \$56,475, and white households in Anne Arundel County had a median income of \$91,815, while Hispanic and Black households had much lower median household incomes in all three counties (see Figure 4) (U.S. Census Bureau, ACS, 2010-2012).

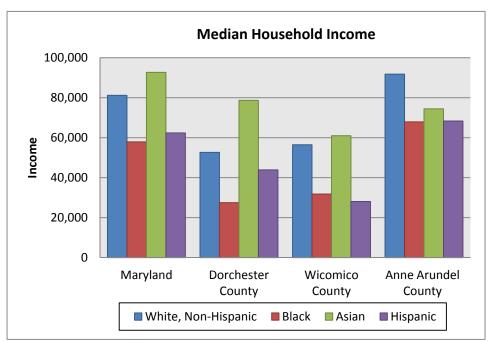

Figure 4. Median Household Income, Wicomico County, Anne Arundel County, Dorchester County, & Maryland (U.S. Census Bureau, ACS 2010-2012, 3-Year Estimates)

Percentage of households with incomes below the federal poverty guidelines within the CBSA

Both Wicomico County and Dorchester County experienced poverty levels higher than the state of Maryland overall. According to the U.S. Census Bureau, between 2008-2012, Dorchester County had 15.9 percent of its population living in poverty, while Wicomico County had 16.2 percent of its population living in poverty. For the same period, 5.9 percent of Anne Arundel County's population lived in poverty, which was lower than Maryland overall.

In 2013, for Maryland overall, approximately 15 percent of Black and 13 percent of Hispanic residents were impoverished, compared to 7 percent of whites and 10 percent of Asians. For each of the 3 counties in the CBSA, non-Hispanic whites had the lowest rate of poverty compared to other racial and ethnic populations; in particular, there was a marked disparity in the poverty rate of Black residents compared to white residents.

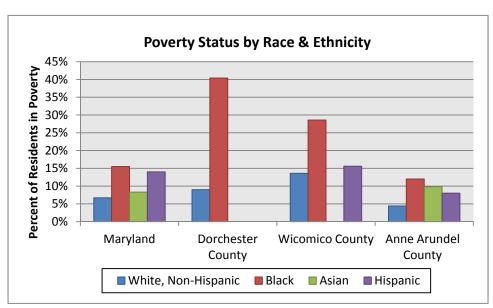

Figure 5. Poverty Rate by Race, Maryland, Dorchester County, Wicomico County, and Anne Arundel County.

Note: Values for Asian residents in Dorchester and Wicomico, and Hispanic residents in Wicomico not shown due to small sample sizes.

(U.S. Census Bureau, ACS 3-Year Estimates, 2011-2013)

Please estimate the percentage of uninsured people by County within the CBSA

Percent Uninsured

Wicomico County: 11.7% Anne Arundel County: 7.2% Dorchester County: 10.4%

Source: U.S. Census Bureau, ACS 3-Year Estimates, 2011-2013

The 2013 1-year estimates for uninsured in Wicomico County show wide disparities between different racial and ethnic groups. More than 40 percent of the Hispanic population of Wicomico County was uninsured, as was 32 percent of the Asain population (see Figure 6). In comparison, for the same time period, only 29 percent of Maryland's Hispanic population was uninsured, as was 16 percent of Maryland's Asian population. By contrast, in 2013, only 11 percent of Wicomico's non-Hispanic white population was uninsured. Fourteen percent of the Black population was uninsured (see Figure 6). While these numbers were relatively low, they were still higher than the statewide estimates for non-Hispanic whites (6%) or Blacks (11%).

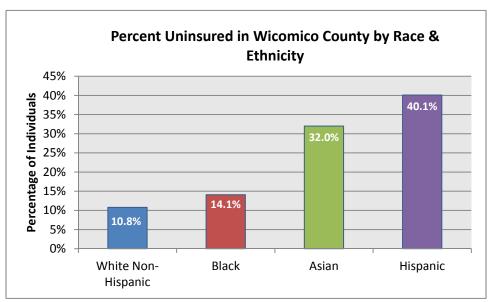

Figure 6. Percent Uninsured in Wicomico County by Race & Ethnicity. (U.S. Census Bureau, ACS 1-Year Estimate, 2013)

Three-year estimates (2011-2013) for uninsured in Dorcheter County also reveal a very large racial/ethnic disparity. More than half of the Hispanic population, 54 percent, was uninsured during this period. In contrast, only 8 percent of the non-Hispanic white population and 11 percent of the Black population were uninsured (see Figure 7). All three groups had a higher percentage of uninsured compared to the state; for the same time period, the uninsured rate for Hispanics in Maryland was 31 percent, for non-Hispanic whites it was 6 percent, and for Blacks it was 11 percent.

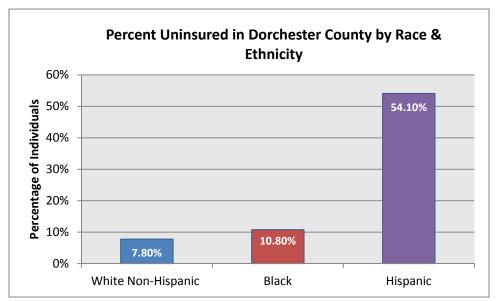

Figure 7. Percent Uninsured in Dorchester County by Race & Ethnicity. (U.s. Census Bureau, ACS 3-Year Estimate, 2011-2013)

For Anne Arundel County, 22 percent of the Hispanic population was uninsured in 2013. In comparison, 9 percent of the Asian population and 8 percent of the Black population was uninsured. For non-Hispanic whites, only 5 percent of the population was uninsured (see Figure 8).

Life Expectancy by County within the CBSA (including by race and ethnicity where data are available).

According to the 2012 Maryland State Health Improvement Process, the overall life expectancy for Maryland was 79.3 years old. The overall life expectancy for Wicomico County was 76.8 years old. Among black residents of Wicomico County, the life expectancy was 74.9 years old, compared to 77.4 years old among white residents of Wicomico County. In Anne Arundel County, the overall life expectancy was 79.0 years. It was 79.2 years for whites, while it was 76.9 years for blacks. In Dorchester County, the overall life expectancy was 77.2 years old in 2012. Among black residents of Dorchester County, the life expectancy was 72.9 years compared to 79.0 years old among white residents (see Figure 9).

Figure 9. Life Expectancy at Birth, Wicomico County, Anne Arundel, and Dorchester County, Maryland, U.S. (Maryland SHIP, 2012)

Mortality Rates by County within the CBSA (including by race and ethnicity where data are available).

Crude Mortality Rates

The 2012 mortality rates in Wicomico County, Anne Arundel County, and Dorchester County were 876.3, 701.9 and 1164.3 per 100,000 population, respectively. In Wicomico and Dorchester, rates were higher than the mortality rate for the state of Maryland overall, at 749.6 per 100,000 population. The Anne Arundel rate was lower than the Maryland rate (see Figure 10).

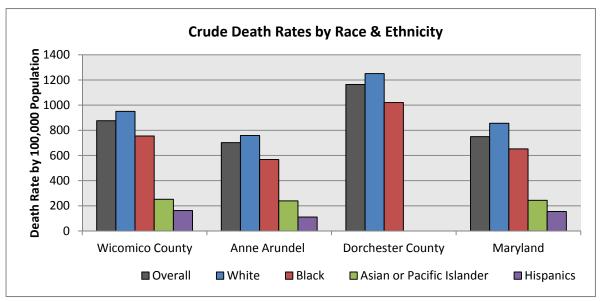

Figure 10. Crude Death Rates by Race & Ethnicity for Wicomico County, Anne Arundel County, Dorchester County, and Maryland Note: Rates for Asian and Hispanic individuals for Dorchester County not included as they are based on <5 events.

(Maryland Vital Statistics Annual Report, 2012)

Heart Disease

The rate of heart disease deaths is higher in Wicomico County (255.0 per 100,000), Anne Arundel County (191.6 per 100,000) and in Dorchester County (198.5 per 100,000 population) than the rate of heart disease death statewide (182.0 per 100,000) (see Figure 11).

Figure 11. Rate of Heart Disease Deaths, Wicomico County, Anne Arundel, and Dorchester County, Maryland, U.S. (Maryland SHIP, 2012)

Infant Mortality

The infant mortality rate is much higher in Dorchester County (16.9 per 1,000 live births) compared to the state of Maryland's rate (6.7 per 1,000 live births). In Anne Arundel County, the overall infant mortality rate, 6.1 per 1,000 live births, is lower than Maryland's. However, the rate for Blacks is more than double that of whites, 12.4 compared to 5.2 (per 1,000 live births) (see Figure 12).

Figure 12. Infant Mortality Rate, by Race/Ethnicity, Wicomico, Anne Arundel, and Dorchester County, Maryland, U.S. (Maryland SHIP, 2012)

Access to Healthy Food

HealthyEating Behaviors

In Wicomico County, 70 percent of the adult population consumes five servings of fruits and vegetables daily. This proportion is slightly lower than Maryland's average of 72.1 percent (Health Indicators Warehouse, 2013).

Wicomico County adults who eat five or more daily servings of fruits and vegetables are fairly evenly distributed among different age groups. However, more Wicomico County residents ages 45-64 eat five or more daily servings of fruits and vegetables, compared to other age groups (see Figure 13)

Adult Fruit and Vegetable Consumption by Age

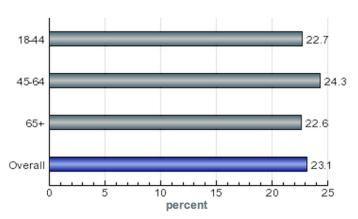

Figure 13. Adult Fruit and Vegetable Consumption by Age, Wicomico County, 2010 (Peninsula Regional Medical Center. Creating Health Communities Community Dashboard. *Wicomico County*. (2013). Accessed: http://www.peninsula.org/body.cfm?id=627)

In Wicomico County, more females than males report consuming five or more fruit and vegetable servings on a daily basis (26.1 percent compared to 19.6 percent)(see Figure 14).

Adult Fruit and Vegetable Consumption by Gender

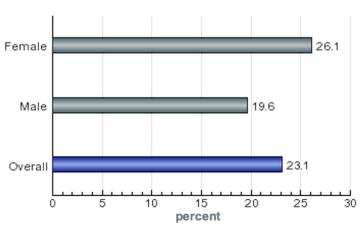

Figure 14. Adults Fruit and Vegetable Consumption by Gender, Wicomico County, 2010

The percentage of Black and white adults in Wicomico County consuming five or more fruits and vegetables a day was approximately the same (see Figure 15).

Adult Fruit and Vegetable Consumption by Race/Ethnicity

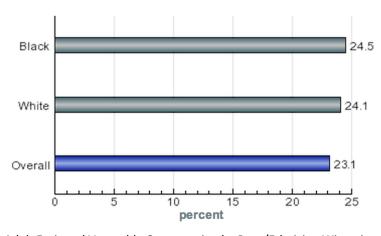

Figure 15. Adult Fruit and Vegetable Consumption by Race/Ethnicity, Wicomico County, 2010

Of all adults in Dorchester County, 77.9 percent had consumed less than five servings of fruits and vegetables per day during 2005-2009. In Anne Arundel County, 72.8 percent of adults had consumed less than five servings of fruits and vegetables for the same time period. These rates are higher than the state of Maryland's 72.4 percent of adults who consumed less than five servings of fruits and vegetables daily (see Figure 16).

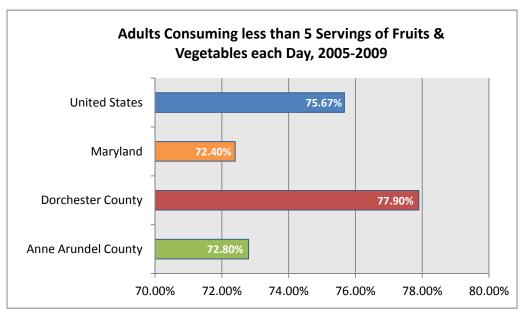

Figure 16. Adults who consume less than five servings of fruits and vegetables daily, United States, Maryland, Dorchester County, and Anne Arundel County, 2005-2009

(Community Commons. *Community Health Needs Assessment*. (2013). Accessed: http://assessment.communitycommons.org/CHNA/)

Food Environment

In 2010, 28.5 percent of the population in Wicomico County and 31.1 percent of the population of Anne Arundel County had low food access. These are much higher percentages of low food access than in Dorchester County (9.8 percent). In comparison, 22.6 percent of the population in the state of Maryland experienced low food access in 2010 (see Figure 17).

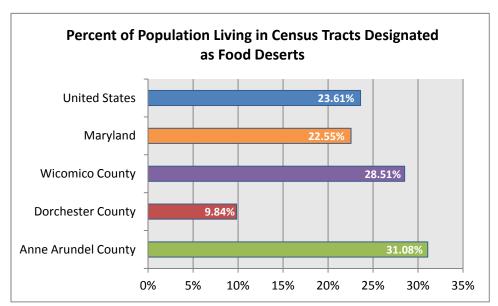

Figure 17. Percentage of the population living in census tracts designated as food deserts in the United States, Maryland,
Dorchester County, Anne Arundel County, and Wicomico County, 2010
(Community Commons. Community Health Needs Assessment. (2013). Accessed:
http://assessment.communitycommons.org/CHNA/)

One measure of healthy food access and environmental influence on healthy behavior is access to grocery stores. The Community Commons defines grocery stores as supermarkets and smaller grocery stores primarily engaged in

retailing a general line of food, such as canned and frozen foods; fresh fruits and vegetables; and fresh and prepared meats, fish, and poultry. Delicatessen-type establishments were included. Convenience stores and large general merchandise stores that also retail food, such as supercenters and warehouse club stores were excluded. In 2012, Wicomico County residents' access to grocery stores was a relatively low 8.1 per 100,000 population, which was significantly lower than Dorchester County's grocery store access at 24.5 per 100,000 population and Anne Arundels's access at 17.9 per 100,000 population. In comparison, access in Maryland was 20.8 per 100,000 population (see Figure 18).

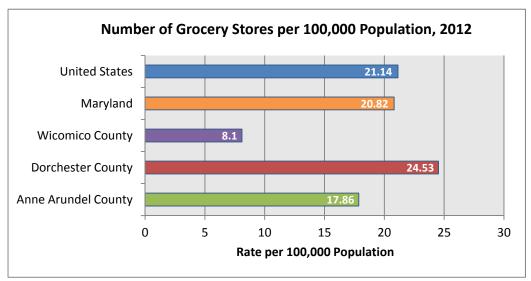

Figure 18. Grocery Store Access per 100,000 population in the United States, Maryland, Wicomico County, Dorchester County, and Anne Arundel County, 2012

(Community Commons. Community Health Needs Assessment. (2013). Accessed: http://assessment.communitycommons.org/CHNA/)

In 2012, Wicomico County residents had access to fast food at a rate of 91.2 per 100,000 population, while Anne Arundel County residents had access of 84.8 per 100,000 population and Dorchester County residents had access of 64.4 per 100,000 population. In comparison, the rate of fast food access in the state of Maryland was 85.8 per 100,000 population, which is lower than the rate in Wicomico County, but higher than the rates in Dorchester County and Anne Arundel County (see Figure 19).

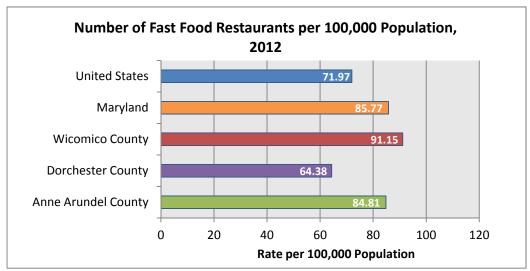

Figure 19. Number of Fast Food Restaurants per 100,000 populations in the United States, Maryland, Wicomico County, Dorchester County, and Anne Arundel County, 2012 (Community Commons. *Community Health Needs Assessment*. (2013). Accessed:

Transporation

Lack of reliable transportation is a common barrier to accessing health care. For low-income people, even those with insurance, access problems remain when they do not have a dependable source of transportation. Unreliable or unavailable public transportation can prevent individuals from seeking care and cause them to miss scheduled appointments. This problem has been well documented across low-income groups – from rural to urban areas and across race and ethnicity. For example, the Children's Health Fund reported that lack of transportation was among the top three persistent barriers to care for individuals across the nation.² Another study in Houston, Texas showed that people who do not use a car to get to medical appointments are more than three times more likely to miss an appointment compared to someone who uses a car.³

The rates of pedestrian injuries on public roads in Wicomico County and Anne Arundel County are significantly lower than the state baseline. The rate in Dorchester County is too small to compare to the state and national baselines (see Figure 20).

| County | SHIP Objective | SHIP 2011 County Baseline | SHIP 2012 County Update | SHIP 2012 Maryland Update | SHIP 2012 County Update (Race/ Ethnicity) | SHIP 2012 Maryland Update (Race/ Ethnicity) | Maryland SHIP 2014 Target | % Difference (Maryland vs. County) |

Figure 20. SHIP Measure of Rate of injuries to pedestrians per 100,000 in Wicomico, Anne Arundel, and Dorchester County, 2012

Traffic fatalities in Wicomico County, while already low, have been on the decline in recent years. In 2010 and 2011, there were eight fatalities of vehicle occupants (each year). This is down from the 12 occupant fatalities in 2008. For both 2010 and 2011, there were no non-occupant (e.g. pedestrians and cyclisits) fatalities, whereas there were six in 2009 and two in 2008. For 2008-2011, non-Hispanic whites accounted for the majority of traffic fatalities (see Figure 21).

In Anne Arundel County, there were a total of 29 vehicle occupant fatalities in 2011, up slightly from 2010. The majority of these fatilities were of non-Hispanic whites. There were a total of 13 non-occupant fatalities in 2011, again up from the previous year and again with non-Hispanic whites accounting of for the majority of the fatilities. Overall, traff fatalities for the county were down from 2008 (see Figure 22).

There were a total of four traffic fatalities, by occupants, in Dorchester County in 2011, more than in 2010 (1), but less than in 2009 (8). There was one non-occupant fatlity in 2011, the same as in 2009 and 2008 (there were none in 2010). For 2008-2011, non-Hispanic whites account for the majority of traffic fatalities (see Figure 23).

Education

Educational Attainment

Wicomico County performed slightly worse than the state baseline with regard to the percentage of students who graduate high school within four years. In 2013, 82 percent of students graduated within four years in Wicomico County (http://www.peninsula.org/), compared to 84.97 percent of students in Maryland (www.mdreportcard.org). The rates for the county and state are both still below the Maryland 2014 SHIP target of 86.1 percent. In Anne Arundel County, 85.57 percent of students graduate in four years (www.mdreportcard.org).

The overall graduation rate in Wicomico County is much lower than in the state of Maryland, and disparities in graduation rates are present among racial/ethnic groups. Of all racial and ethnic groups, Asians have the highest high school graduation rates (95 percent) and individuals identifying as two or more races have the lowest high school graduation rates (76.4 percent) (see Figure 24).

In 2013, Dorchester County performed slightly worse than the state baseline with regard to the percentage of students who graduate high school four years after entering 9th grade at 83.8 percent, compared to 84.97 percent statewide (www.mdreportcard.org). The rate for both the Dorchester County and the state are both slightly lower

than the Maryland SHIP 2014 target of 86.1 percent. Dorchester County's Black residents have the lowest percentage of students who graduate high school at 78.2 percent compared to Dorchester County's white residents at 86.2 percent (see figure 24).

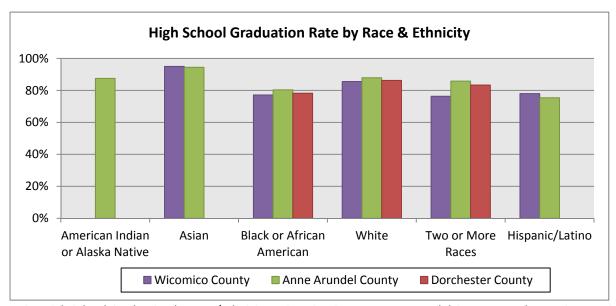

Figure 24. High School Graduation by Race/Ethnicity, Wicomico County, Anne Arundel County, Dorchester County, 2013

Note: Rates for American Indians (Wicomico & Dorchester), Asians (Dorchester) and Hispanics (Dorchester) are not included due to small sample sizes.

(www.mdreportcard.com)

In Wicomico County, there was a disproportionately higher percentage of Asians (50.2 percent) ages 25+ who have earned a bachelor's degree or higher from 2008-2012 compared to other racial/ethnic groups (see Figure 25).

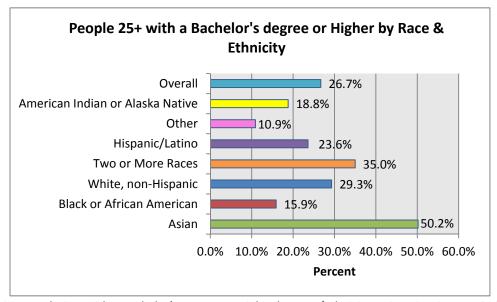

Figure 25. People 25+ with a Bachelor's Degree or Higher by Race/Ethnicity, Wicomico County, 2008-2012 (Peninsula Regional Medical Center, Creating Healthy Communities; Retrieved from: www.peninsula.org/chc)

Math and Reading Proficiency

Regarding student scores on the Maryland School Assessment, Asians in Wicomico County had the highest percentage of eighth grade students that are proficient or advanced in reading (83.3 percent), and whites had the second highest percentage at 82.5 percent. Blacks/African Americans and Hispanics had the lowest percentage of eighth grade students that are proficient or advanced in reading at 52.9 percent and 57.6 percent, respectively (see Figure 26).

Regarding student scores on the Maryland School Assessment in Dorchester County, students reporting two or more races represent the highest percentage of eighth grade students that are proficient or advanced in reading (84.6 percent), while whites had the second highest percentage at 80.9 percent. Blacks/African Americans and Hispanics had the lowest percentage of eighth grade students proficient or advanced in reading at 50.0 percent and 46.2 percent, respectively (see Figure 26).

Regarding student scores on the Maryland School Assessment in Anne Arundel County, 90.3 percent of Asian students were proficient/advanced in reading in the eighth grade, the highest of all racial/ethnic groups. Non-Hispanic white students were the second highest, at 83.4 percent. In comparison, only 68.3 percent of Hispanic students and 63.9 percent of Black students demonstrated proficiency in reading (see Figure 26).

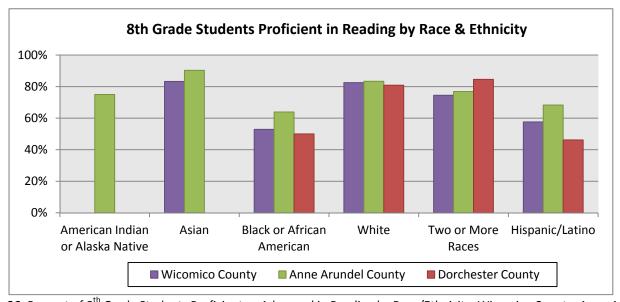

Figure 26. Percent of 8th Grade Students Proficient or Advanced in Reading by Race/Ethnicity, Wicomico County, Anne Arundel County, and Dorchester County, 2013

Note: Rates for American Indians (Wicomico & Dorchester) and Asians (Dorchester) are not included due to small sample sizes.

(www.mdreportcard.com)

In both Wicomico and Anne Arundel County, Asian eighth grade students were the most proficient at math, at 81.3 percent and 78.4 percent, respectively. In Dorchester County, rates were typically lower for all racial/ethnic goups compared to the other two counties in the CBSA. For Black students in Dorchester County, only 26.5 percent of students were proficient in math; for Hispanic students, only 15.4 percent were proficient (see Figure 27).

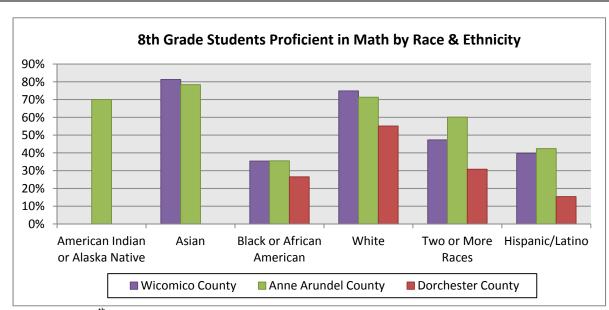

Figure 27. Percent of 8th Grade Students Proficient or Advanced in Math by Race/Ethnicity, Wicomico County, Anne Arundel County, and Dorchester County, 2013

Note: Rates for American Indians (Wicomico & Dorchester) and Asians (Dorchester) are not included due to small sample sizes.

(www.mdreportcard.com)

Readiness for Kindergarten

According to the SHIP 2012 county update, Dorchester County performed worse than the state as well as the 2014 target in regard to the percentage of children entering kindergarten ready to learn (see Figure 28). Wicomico and Anne Arundel counties both performed better than the state and have both also surpassed the 2014 target. Despite this, disparities remain evident in Wicomico and Anne Arundel Counties; blacks and Hispanics have the lowest rates of children entering kindergarten ready to learn compared to other groups.

Housing Quality

A person's living situation – the condition of their homes and neighborhoods – is a crucial determinant of health status. Across the country, a disproportionate percentage of minority households are affected by moderate and severe housing problems (see Figure 29).

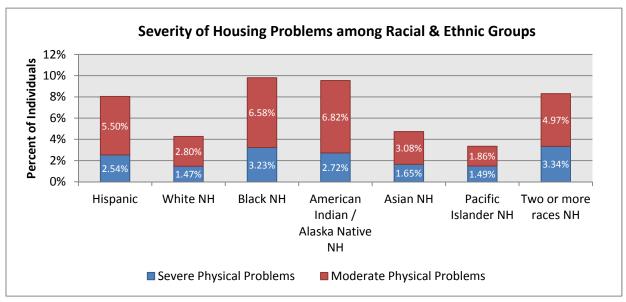

Figure 29. Housing Quality – Selected Physical Problems by Race, United States, 2011

Note: Includes problems with plumbing, heating, electrical, and upkeep

(U.S. Census Bureau, American Housing Survey, 2011)

At the state level, 16 percent of households in Maryland were identified as having at least 1 of 4 severe housing problems: overcrowding, high housing costs, or lack of kitchen or plumbing facilities. At the county level, Anne Arundel experienced lower rates of severe housing problems (14 percent) while Wicomico (18 percent) and Dorchester (20 percent) had rates higher than that of the state. (www.CountyHealthRankings.org, 2006-2010)

Spotlight on Homelessness

Perhaps the most extreme case of living situation having a negative impact on health is that of homelessness. In fiscal year 2011, in the state of Maryland, 21,947 individuals were reported as homeless to the Homeless Management Information System.⁴

Dorchester County

In Dorchester County, a total of 24 individuals were reported as homeless in FY 2011. Twenty-three individuals were between the ages of 25 and 61; one individual was older than 62 (see Figure 30). All of the individuals were of Hispanic ethnicity; 17 were African American, 5 were white, and 2 were 'Other' (see Figure 31). Of the 24 individuals, 7 were noted as chronically homeless, 5 were veterans, and 3 were disabled (see Figure 32).

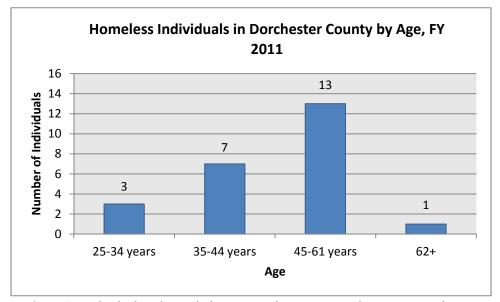

Figure 30. Individuals utilizing shelters in Dorchester County during FY 2011, by age Maryland Department of Human Resources, Annual Report on Homeless Services in Maryland

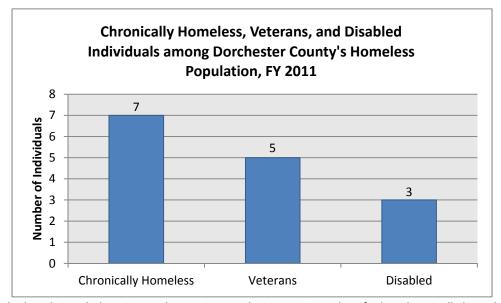

Figure 32. Individuals utilizing shelters in Dorchester County during FY 2011, identified as chronically homeless, a veteran, or diasbaled

Maryland Department of Human Resources, Annual Report on Homeless Services in Maryland

Wicomico County

In Wicomico County, a total of 818 individuals were reported as homeless in FY 2011. More than a quarter of these individuals, 236, were between the ages of 45 and 61. Nearly one-fifth of the homeless individuals, 160, were children under the age of 18. Twenty-four were adults aged 62 or older (see Figure 33). The vast majority of homeless individuals were either African American (436) or white (317); the remaning individuals were either American Indian, Asian, Other/multi-racial, or refused (see Figure 34). Most of the homeless individuals in Wicomico County were non-Hispanic (see Figure 35). Of the homeless individuals, eleven were noted as chronically homeless, 67 were veterans, and 150 were disabled (see Figure 36).

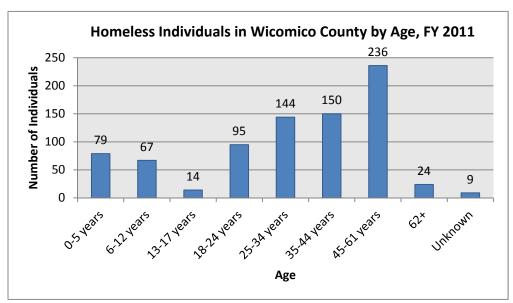

Figure 33. Individuals utilizing shelters in Wicomico County during FY 2011, by age Maryland Department of Human Resources, Annual Report on Homeless Services in Maryland

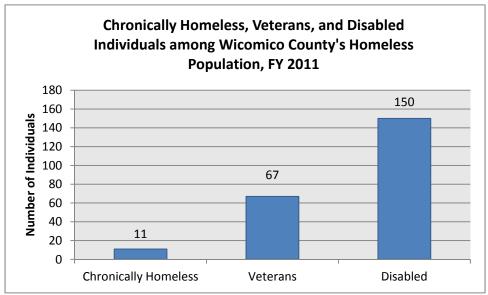

Figure 36. Individuals utilizing shelters in Wicomico County during FY 2011, identified as chronically homeless, a veteran, or diasbaled

Maryland Department of Human Resources, Annual Report on Homeless Services in Maryland

Anne Arundel County

In Anne Arundel County, more than 900 individuals were reported as being homeless in fiscal year 2011. About one-fourth of these individuals were between the ages of 45-61; another 393 were adults between the ages of 18 and 44. More than 300 were children aged 0-17 (see Figure 37). The majority of individuals reported as homeless were Black or white (see Figure 38). More than 90% of the individuals were non-Hispanic (see Figure 39). A total of 171 individuals were chronically homeless, 56 were veterans, and 221 were disabled (see Figure 40).

III. COMMUNITY BENEFIT ADMINISTRATION

- 1. Please answer the following questions below regarding the decision making process of determining which needs in the community would be addressed through community benefits activities of your hospital?
 - a. Is Community Benefits planning part of your hospital's strategic plan?

| <u>X</u> | _Yes |
|----------|------|
| | No |

- b. What stakeholders in the hospital are involved in your hospital community benefit process/structure to implement and deliver community benefit activities? (Please place a check next to any individual/group involved in the structure of the CB process and provide additional information if necessary):
 - i. Senior Leadership
 - 1. _X CEO
 - 2. <u>X</u> CFO
 - **3.** _X__Other (please specify): Executive Director for the Center for Health Equity and Wellness; Associate Vice President for Mission Integration & Spiritual Care
 - ii. Clinical Leadership
 - **1.** X Physician (Chief Medical Officer)
 - **2.** _X_Nurse (CNE & VP of Patient Care Services)
 - **3.** _X_**Social Worker** (Director of Case Management)
 - **4.** X Other (please specify): Allied Health Professionals
 - iii. Community Benefit Department/Team
 - 1. X Individual (please specify FTE): 1 FTE Community Benefits Manager
 - 2. X Committee (please list members): Executive Director, Center for Health Equity & Wellness; Associate VP, Mission Integration & Spiritual Care; Project Manager, Community Benefit; Manager, Community Health & Outreach; Financial Services Project Manager; Senior Tax Accountant, Finance; Planning & Marketing Analyst; Communications Specialist, Public Relations/Marketing; Director of Population Health & Case Management at Adventist HealthCare Washington Adventist Hospital; VP of Operations at Adventist HealthCare Shady Grove Medical Center; Director of Population Health and Case Management at Adventist HealthCare Shady Grove Medical Center; Community Liaison at Adventist HealthCare Behavioral Health & Wellness; and Cultural Diversity Liaison at Adventist HealthCare Rehabilitation Hospital.
 - 3. ___Other (please describe)

| c. | s there an internal audit (i.e., an internal review conducted at the hospital) of the Community Benefit eport? | | | |
|----|--|--|--|--|
| | Spreadsheet X_YesNo | | | |
| | Narrative <u>X</u> YesNo | | | |
| d. | Does the hospital's Board review and approve the FY Community Benefit report that is submitted to the HSCRC? | | | |
| | SpreadsheetYesXNo | | | |
| | NarrativeYesXNo | | | |
| | | | | |

If you answered no to this question, please explain why:

The hospital's Board reviewed and approved the Community Health Needs Assessment and Implementation Strategy. The Community Benefit report that is submitted to the HSCRC (both spreadsheet and narrative) was reviewed and approved by Executive Leadership of the hospital. The Adventist HealthCare Board of Trustees only meets twice per year so they have not yet had a chance to review this report, but they will review this Community Benefit report when they next meet in Q1 2015.

IV. HOSPITAL COMMUNITY BENEFIT PROGRAM AND INITIATIVES

This Information should come from the implementation strategy developed through the CHNA process.

1. Please use Table III (see attachment)or, as an alternative, use Table IIIA, to provide a clear and concise description of the primary needs identified in the CHNA, the principal objective of each initiative and how the results will be measured, time allocated to each initiative, key partners in the planning and implementation of each initiative, measured outcomes of each initiative, whether each initiative will be continued based on the measured outcomes, and the current FY costs associated with each initiative. Use at least one page for each initiative (at 10 point type). Please be sure these initiatives occurred in the FY in which you are reporting. Please see attached examples of how to report.

For example: for each principal initiative, provide the following:

- Identified need: This includes the community needs identified by the CHNA. Include any measurable disparities and poor health status of racial and ethnic minority groups.
- Name of Initiative: insert name of initiative.
- Primary Objective of the Initiative: This is a detailed description of the initiative, how it is intended to address the identified need, and the metrics that will be used to evaluate the results (Use several pages if necessary)
- Single or Multi-Year Plan: Will the initiative span more than one year? What is the time period for the initiative?
- Key Partners in Development/Implementation: Name the partners (community members and/or hospitals) involved in the development/implementation of the initiative. Be sure to include hospitals with which your hospital is collaborating on this initiative.
- How were the outcomes of the initiative evaluated?

- Outcome: What were the results of the initiative in addressing the identified community health need, such as a reduction or improvement in rate? (Use data to support the outcomes reported). How are these outcomes tied to the objectives identified in item C?
- Continuation of Initiative: Will the initiative be continued based on the outcome?
- Expense: A. What were the hospital's costs associated with this initiative? The amount reported should include the dollars, in-kind-donations, or grants associated with the fiscal year being reported. B. Of the total costs associated with the initiative, what, if any, amount was provided through a restricted grant or donation?

Table III

Initiative Chemical Dependence/Substance Abuse among Adolescents (CHNA Implementation Strategy Initiative) **Identified Need** Illicit drug use in America continues to be an increasing problem. In 2012, an estimated 9.2 percent of the population (aged 12 or older) had used an illicit drug or abused a psychotherapeutic medication in the past month⁵. A large gap in treatment persists. In 2012 an estimated 8.9 percent of Americans needed treatment for a problem related to drugs or alcohol but only 1 percent received treatment at a specialty facility⁶. The drug-induced death rate in Maryland (14.4 per 100,000) exceeds the national average (12.7 per 100,000), with heroin being the primary reason for treatment⁷. Among Wicomico County residents, 14.2 percent reported binge drinking at least once during 30 days (2009-2011)8. The prevalence of binge drinking increased in Wicomico County from 9.5 percent in 2009 to 14.2 percent in 2011⁹. While Active Parenting workshops for parents of patients in the Residential Treatment Center (RTC) have previously been hosted, chemical dependence and substance

abuse prevention education was previously not offered to parents and families of RTC patients. Also, based on statistics identified in the CHNA, a need existed to improve community prevention and education strategies with regard to chemical dependence/substance abuse. A lack of transportation to evening meetings was identified as a possible access barrier.

Hospital Initiative

Adventist HealthCare Behavioral Health & Wellness Services, Eastern Shore implemented an initiative to increase chemical dependence/substance abuse awareness and education for community members in their service area.

Strategies include:

- Adapting their free Active Parenting Workshops to include chemical dependence and substance abuse education, including recognizing warning signs and symptoms for parents
- Offering transportation services for Active Parenting Workshops
- Educating parents, community members, and medical professionals about locally

| | groups to expand community outreach and education | | | |
| Primary Objective | Goal: Provide drug awareness and education programs for community members to increase | | | |
| | prevention and reduce the number of opiate or other substance dependent admissions for | | | |
| | adolescents. | | | |
| | | | | |
| | Objectives: | | | |
| | 1. The hospital will host free quarterly Active Parenting courses, incorporating chemical | | | |
| | dependence and substance abuse education, to parents of patients currently in the | | | |
| | Residential Treatment Center (RTC), as well as to other interested parents and/or | | | |
| | community members. | | | |
| | 2. The hospital will deliver five (5) drug education programs annually for parents, | | | |
| | community members, and medical professionals discussing substance abuse | | | |
| | prevention and treatment resources in partnership with local community | | | |
| | organizations. | | | |
| | | | | |
| | These activites will address the problem of chemical dependence, including alcohol abuse, | | | |
| | that has been obsereved in the hospital's CBSA. The metrics that will be used to evaluate this | | | |
| | initiative include measures such as: number of Active Parenting courses offered, number of | | | |
| | drug education courses offered, number of attendees at each session, and participant | | | |
| | satisfaction with the information provided. At the conclusion of the three year initiative in | | | |
| | 2016, the rate of opiate or other substance dependent admissions for adolscents will be | | | |
| | compared to that of 2013 to assess for change. | | | |

2. Were there any primary community health needs that were identified through the CHNA that were not addressed by the hospital? If so, why not? (Examples include other social issues related to health status, such as unemployment, illiteracy, the fact that another nearby hospital is focusing on an identified community need, or lack of resources related to prioritization and planning.) This information may be copied directly from the CHNA that refers to community health needs identified but unmet.

V. PHYSICIANS

1. As required under HG§19-303, provide a written description of gaps in the availability of specialist providers, including outpatient specialty care, to serve the uninsured cared for by the hospital.

Based on the 2008 Maryland Physician Workforce Study, sponsored by the Maryland Hospital Association and MedChi, the Maryland State Medical Society, the eastern region including Wicomico and Dorechester Counties, has shortages in 18 of 30 physician specialty groups¹⁰. Shortages were identified among primary care, allergy, dermatology, endocrinology, gastroenterology, hematology/oncology, neurology, psychiatry, rhematology, anesthesiology, diagnostic radiology, pathology, physical medicine, general surgery, opthamology, orthopedic surgery, thoracic surgery, and vascular surgery. In contrast, in the central region which includes Anne Arundel County, physician shortages were only found in 5 of 30 physician speciality groups. Shortages were identified among dermatology, hematology/oncology, emergency medicine, pathology, and thoracic surgery.

Across the state, medical specialists are projected to decrease from 40 per 100,000 state residents to 37 per 100,000 in 2015. In the eastern region, it is expected that shortages will increase in 2015, while in the central region physician supplies are expected to remain adequate.

2. If you list Physician Subsidies in your data in category C of the CB Inventory Sheet, please indicate the category of subsidy, and explain why the services would not otherwise be available to meet patient demand. The categories include: Hospital-based physicians with whom the hospital has an exclusive contract; Non-Resident house staff and hospitalists; Coverage of Emergency Department Call; Physician provision of financial assistance to encourage alignment with the hospital financial assistance policies; and Physician recruitment to meet community need.

In accordance with Adventist Healthcare's mission of demonstrating God's care by improving the health of people and communities through a ministry of physical, mental, and spiritual healing, Adventist Behavioral Health & Wellness Services – Eastern Shore provided the following physician services, by category, as a community benefit in 2013:

Non-Resident House Staff & Hospitalists

- Adult Acute Care Services (Inpatient)
- Child & Adolescent Care Services (Inpatient)
- Outpatient Services

Physician Recruitment to Meet Community Need

- Adult Acute Care Services (Inpatient)
- Child & Adolescent Care Services (Inpatient)
- Outpatient Services

The following table details the dollar amount of physician subsidies that Adventist HealthCare Behavioral Health & Wellness Services – Eastern Shore provided:

| Physician Category | Amount |
|--|--------------|
| Non-Resident House Staff & Hospitalist | \$498,492.40 |
| Recruitment of Physicians To Meet Community Need | \$324,565.93 |
| Continuing Care | \$2,708.51 |
| Women's & Children's Services | \$11.79 |
| Total | \$825,778.63 |

¹⁰ Maryland Hospital Association & MedChi the Maryland State Medical Society. 2008. Maryland Physician Workforce Study.

VI. APPENDICES

- 1. Describe your Financial Assistance Policy (FAP):
 - a. Describe how the hospital informs patients and persons who would otherwise be billed for services about their eligibility for assistance under federal, state, or local government programs or under the hospital's FAP. (label appendix I)
 - b. Include a copy of your hospital's FAP. (label appendix II)
 - c. Include a copy of the Patient Information Sheet provided to patients in accordance with Health-General 19-214.1(e). Please be sure it conforms to the instructions provided in accordance with Health-General 19-214.1(e).
- 2. Attach the hospital's mission, vision, and value statement(s) (label appendix IV)

Appendix I

Financial Assistance Policy Description

Adventist HealthCare Behavioral Health & Wellness Services Eastern Shore informs patients and persons of their eligibility for financial assistance according to the National CLAS standards and provides this information in both English and Spanish at several intervals and locations. The Hospital's Notice of Financial Assistance and Charity Care Policy is clearly posted in the emergency department and inpatient admitting areas so that patients are aware that they can request financial assistance if they do not have the resources necessary for the total payment of their bill. If a patient requests a copy of the Hospital's charity policy (FAP) at either the time of admission or discharge, a copy of the document is provided to them.

If the Hospital determines at the time a patient is admitted that they do not have the financial means to pay for their services the patient is informed that they can apply for financial assistance from the Hospital. If a patient is admitted without resolving how their bill will be paid, a financial counselor will visit their room to discuss possible payment arrangements. If the financial counselor determines if the patient qualifies for Medicaid, an outside contractor experienced in qualifying patients for Medicaid will speak to the patient to determine if the patient qualifies for Medicaid or some other governmental program.

As self-pay and other accounts are researched by representatives from the billing department after no payments or only partial payments have been received, the billing department will explain to the patients that financial assistants may be available if they do not have the financial means to pay their bill. If patients request financial assistance, at that time, a copy of the Hospital's charity application will be sent to them.

The Hospital has an outside contractor experienced in qualifying patients for Medicaid to review potential emergency room patients who may qualify for Medicaid.

Financial Assistance Policy

Corporate Policy Manual

Financial Assistance – Decision Rules/Application (Formerly known as Charity Care Policy)

01/08 Effective Date Policy No:

AHC 3.19.0 Cross Referenced: Financial Assistance - Decision Rules/Application Origin: **PFS**

(see Master Policy 3.19 Financial Assistance)

02/09, 06/15/10, 9/19/13 Authority: EC Reviewed: 05/09, 06/09, 10/09, 06/15/10, 3/2/11, 10/02/13 Revised: Page: 1 of 12

DECISION RULES:

- **A.** The patient would be required to fully complete an application for Charity Care and/or completion of the "Income" and "Family Size" portions of the State Medicaid Application could be considered as "an application for Charity Care." A final decision will be determined by using; an electronic income estimator, the state of Maryland poverty guidelines and the review of requested documents. An approved application for assistance will be valid for twelve (12) months from the date of service and may be applied to any qualified services (see "A" above), rendered within the twelve (12) month period. The patient or Family Representative may reapply for Charity Care if their situation continues to merit assistance.
 - 1. Once a patient qualifies for Charity Care under this policy the patient or any immediate family member of the patient living in the same household shall be eligible for Charity Care at the same level for medically necessary care when seeking subsequent care at the same hospital during the 12 month period from the initial date of service.
 - 2. When the patient is a minor, an immediate family member is defined as: mother, father, unmarried minor natural or adopted siblings, natural or adopted children residing in the same household.
 - 3. When the patient is not a minor, an immediate family member is defined as: spouse, minor natural or adopted siblings, natural or adopted children residing in the same household.
- **B.** Where a patient is deceased with no designated Executor, or no estate on file within the appropriate jurisdiction(s), the cost of any services rendered can be charged to Charity Care without having completed a formal application. This would occur after a determination that other family members have no legal obligation to provide Charity Care. After receiving a death certificate and appropriate authorization, the account balance will be adjusted via the appropriate adjustment codes 23001 - Account in active AR, 33001 -Account in Bad Debt.
- C. Where a patient is from out of State with no means to pay, follow instructions for "A" above.
- D. A Maryland Resident who has no assets or means to pay, follow instructions for "a" above.

NOTICE TO BE POSTED IN THE ADMISSIONS OFFICE, BUSINESS OFFICE AND THE EMERGENCY DEPARTMENT

ADVENTIST HEALTHCARE NOTICE OF AVAILIBILITY OF CHARITY CARE

Shady Grove Adventist, Adventist Behavioral Health, Washington Adventist Hospital and Adventist Rehab Hospital of Maryland will make available a reasonable amount of health care without charge to persons eligible under Community Services Administration guidelines. Charity Care is available to patients whose family income does not exceed the limits designated by the Income Poverty Guidelines established by the Community Services Administration. The current income requirements are the following. If your income is not more than six times these amounts, you may qualify for Charity Care.

| Size of Family Unit | <u>Guideline</u> |
|---------------------|------------------|
| 1 | \$11,490 |
| 2 | \$15,510 |
| 3 | \$19,530 |
| 4 | \$23,550 |
| 5 | \$27,570 |
| 6 | \$31,590 |
| 7 | \$35,610 |
| 8 | \$39,630 |

Note: The guidelines increase \$4,020 for each additional family member.

If you feel you may be eligible for Charity Care and wish to apply, please obtain an application for Community Charity Care from the Admissions Office or by calling (301) 315-3660.

Appendix III

Patient Information Sheet

Maryland Hospital Patient Information

Hospital Financial Assistance Policy

Adventist HealthCare is committed to meeting the health care needs of its community through a ministry of physical, mental and spiritual healing. In compliance with Maryland law, Adventist HealthCare has a financial assistance policy and program. You may be entitled to receive free or reduced-cost medically necessary hospital services. This facility exceeds Maryland law by providing financial assistance based on a patient's need, income level, family size and financial resources. Information about the financial assistance policy and program can be obtained from any Patient Access Representative and from the Billing Office.

Patients' Rights

As part of Adventist HealthCare's mission, patients who meet financial assistance criteria may receive assistance from the hospital in paying their bill. Patients may also be eligible for Maryland Medical Assistance - a program funded jointly by state and federal governments. This program pays the full cost of healthcare coverage for low-income individuals meeting specific criteria (see contact information below). Patients who believe they have been wrongly referred to a collection agency have the right to request assistance from the hospital.

Patients' Obligations

Patients with the ability to pay their bill have an obligation to pay the hospital in a timely manner. Adventist HealthCare makes every effort to properly bill patient accounts. Patients have the responsibility to provide correct demographic and insurance information. Patients who believe they may be eligible for assistance under the hospital's financial assistance policy, or who cannot afford to pay the bill in full, should contact a Financial Counselor or the Billing Department (see contact information below). In applying for financial assistance, patients have the responsibility to provide accurate, complete financial information and to notify the Billing Department if their financial situation changes. Patients who fail to meet their financial obligations may be referred to a collection agency.

Contact Information

To inquire about assistance with your bill or to make payment arrangements, please call the Billing Office at (301) 315-3660. A hospital representative will be glad to assist you with any questions you may have.

If you wish to get more information about or apply for the Maryland Medical Assistance Program, you may contact your local Department of Social Services by phone 1-800-332-6347; TTY: 1-800-925-4434; or online at www.dhr.state.md.us.

*Note: Physician services provided during your stay are not included on your hospital billing statement and will be billed separately.

Appendix IV

Hospital Mission, Vision, and Value Statements

Mission

We demonstrate God's care by improving the health of people and communities through a ministry of physical, mental, and spiritual healing.

Vision

We will be a high performance integrator of wellness, disease management and health care services, delivering superior health outcomes, extraordinary patient experience and exceptional value to those we serve.

Values

Adventist HealthCare has identified five core values that we use as a guide in carrying out our day-to-day activities:

- a. **Respect:** We recognize the infinite worth of each individual and care for them as a whole person.
- b. Integrity: We are above reproach in everything we do.
- c. Service: We provide compassionate and attentive care in a manner that inspires confidence.
- d. **Excellence:** We provide world class clinical outcomes in an environment that is safe for both our patients and care givers.
- e. **Stewardship:** We take personal responsibility for the efficient and effective accomplishment of our mission.
