

of a targeted community benefit initiative. As the community benefit law is broad with regard to evaluation efforts, the Commission asked hospitals to provide information on the steps taken to evaluate the effectiveness of its community benefit initiatives and chose not to prescribe the type of evaluation effort Maryland hospitals should employ. Additionally, the Commission believed it was necessary to focus first year reporting efforts on implementing the new community benefit reporting requirements and achieving as much data consistency between hospitals as possible.

To help hospitals better understand what types of evaluation efforts may have more value, the Commission worked with many interested parties to develop an evaluation framework for hospitals to use in determining appropriate information to submit along with the community benefit data spreadsheet for FY 2005. The evaluation framework contains a list of succinct questions that hospitals can answer (and pose internally) to give the public a better understanding of how a hospital's community benefit are evaluated, if they are incorporated into the facility's overall strategic plan, the sustainability of initiatives, and other related information.

While many hospitals chose to use the new evaluation framework, other hospitals continued to use an existing or hospital specific evaluation description, leading to inconsistency and less comparability in hospital reporting efforts. The Commission, therefore, commits to working with interested parties in further fine-tuning of the evaluation component of the community benefits reporting requirements.

Hospital Rate Support for Community Benefit Programs

In Maryland, the costs of uncompensated care (both charity care and bad debt) and graduate medical education are built into the rates that hospitals are reimbursed by all payers, including Medicare and Medicaid. Additionally, the HSCRC also includes amounts in rates for hospital nurse support programs provided at Maryland hospitals. To avoid accounting confusion between programs that are funded in part or in whole through hospital rate funds (regulated) or programs that are not funded by hospital rate funds (unregulated), the HSCRC asked hospitals not to include revenue provided in rates as offsetting revenue on the CBR worksheet. The following section details the amounts of Nurse Support Program, uncompensated care, and graduate medical education (both direct and indirect), costs that are included in rates for Maryland hospitals in Fiscal Year 2005 funded by all payers.

Nurse Support Program

The Nurse Support Program provides hospitals with grants to increase the recruitment and retention of nurses in Maryland hospitals. In FY 2005, nearly \$7.2 million was provided to Maryland hospitals to increase the recruitment and retention of nurses in Maryland hospitals. .

For further information about funding provided to specific hospitals, please see Attachment IV.

Uncompensated Care

The HSCRC includes an amount in hospital rates for uncompensated care; this includes both charity care (eligible for inclusion as a community benefit by Maryland hospitals in their CBRs) and bad debt (not considered a community benefit). In FY 2005, nearly \$642million was provided in Maryland hospital rates for the provision of both charity care and hospital bad debt funded by all payers. Hospitals were asked not to include revenue provided through hospital rate

as offsetting revenue on the CBR worksheet.

For further information about funding provided to specific hospitals, please see Attachment IV.

Graduate Medical Education

Another social cost funded in Maryland's rate-setting system is the cost of graduate medical education (GME), generally for interns and residents trained in Maryland hospitals. Graduate medical education costs are divided into direct and indirect medical education components for identification and reimbursement purposes. Direct medical education costs are those directly incurred in the operation of teaching activities and consist of salaries and fringe benefits of residents and interns, faculty supervisory expenses, and allocated overhead. By contrast, indirect medical education expenses are generally described as those additional costs incurred as a result of the teaching program (e.g., increase patient severity associated with teaching programs and inefficiencies, such as extra tests ordered by interns/residents or the extra costs of supervision). The Commission utilizes an annual hospital intern and resident count to assist in quantifying the direct and indirect costs of medical education in physician training programs, and recognizes only the interns and residents included on the survey up the hospital's cap. Any resident and intern costs above the hospital's recognized cap, therefore, would not be funded through hospital rates. For FY 2005, over \$394 million was provided to Maryland hospitals to train residents and interns.

For further information about funding provided to specific hospitals, please see Attachment IV.

Conclusion

As stated earlier, the HSCRC views Maryland's Community Benefit Report as an evolving work-in-progress, where the Commission hopes to build upon the successes of the two years' reporting efforts and add to the value of the report in future CBRs. In many instances, individual CBRs represent the first exhaustive inventory of a hospital's community benefits initiatives, one that required hard work and diligence by many Maryland hospital employees. The Commission would like to thank the Maryland Hospital Association, the Institute for Community Health, Local Health Departments, the VHA, the CHA, Maryland hospitals, and many others whose contributions culminated with the production of this report. Finally, we would ask for the continued assistance of these and other groups, as the Commission works to refine and improve the public policy value of Maryland's Community Benefit Report.

Individual Hospital Community Benefit Inventory Worksheets
Available at <http://www.hsrc.state.md.us> September, 2006

Attachment III

Description and Overview of CBR Data Inventory Worksheet

I. Accounting for Community Benefits

In terms of financial accounting practices, the HSCRC directed hospitals to use audited financial statements as the source in calculating costs in care categories.

A. Staff Hours and Number of Encounters

This column includes the number of staff hours associated with and the number of encounters served by the reported community benefit activity⁶.

B. Net Community Benefit

The Net Community Benefit column subtracts the sum of the hospital's reported direct and indirect costs from any reported offsetting revenue for each individual community benefit.

Direct costs include salaries, employee benefits, supplies, interest on financing, travel, and other costs that are directly attributable to the specific service and that would not exist if the service or effort did not exist.

Indirect costs are costs not attributed to products and/or services that are included in the calculation of costs for community benefit. These could include, but are not limited to, salaries for human resource and finance departments, insurance, and overhead expenses. Hospitals can currently calculate an indirect cost ratio from their HSCRC Annual Cost Report data or enter a discrete dollar value that may more appropriately capture the value of the indirect costs.

Offsetting revenue includes funds received from external sources (grants, etc.) to provide the individual community benefit reported. Offsetting revenue provided in the form of HSCRC-approved rates to the hospital is not reported in this column.

II. Community Benefit Categories and Reporting Guidelines

As defined under current Maryland law, community benefit means an activity that is intended to address community needs and priorities primarily through disease prevention and improvement of health status, including:

- health services provided to vulnerable or underserved populations;
- financial or in-kind support of public health programs;
- donations of funds, property, or other resources that contribute to a community priority;
- health care cost containment activities; and
- health education, screening, and prevention services.

A. COMMUNITY HEALTH SERVICES

Community health services include activities carried out to improve community health. They extend beyond patient care activities and are usually subsidized by the health care organization. Community services do not generate inpatient or outpatient bills, although there may be a nominal patient fee and/or sliding scale fee. Forgiving inpatient and outpatient care bills to low income persons is reported

⁶ Note that number of encounters is different than number of people served.

separately as charity care (H Charity Care).

Specific community health services include:

- Community health education
- Community-based clinical services, such as free clinics and screenings
- Support groups
- Health care support services, such as enrollment assistance in public programs, and transportation efforts
- Self-help programs, such as smoking-cessation and weight-loss programs
- Pastoral outreach programs
- Community-based chaplaincy programs
- Community spiritual care
- Social services programs for vulnerable populations in the community
- Other areas

Again, Maryland law defines a community benefit as an activity that is “intended to address community needs and priorities primarily through disease prevention and improvement of health status.”

A1. Community Health Education

Community health education includes lectures, presentations, and other programs and activities provided to groups, without providing clinical or diagnostic services. Community benefit in this area can include staff time, travel, materials, and indirect costs.

Support Groups

Support groups typically are established to address social, psychological or emotional issues related to specific diagnoses or occurrences. These groups may meet on either a regular or an intermittent basis.

Self-help

Wellness and health promotion programs offered to the community, such as smoking-cessation, exercise, and weight-loss programs.

A2. Community-Based Clinical Services

These clinical services are clinical services provided (e.g., free clinics, screenings, or one-time events) to the community. This category does NOT include permanent subsidized hospital outpatient services. (this is reported in C Mission Driven Health Services).

Screenings

Screenings are health tests that are conducted in the community as a public clinical service, such as blood pressure measurements, cholesterol checks, school physicals and other events. They are a secondary prevention activity designed to detect the early onset of illness and disease and can result in a referral to any community medical resource.

One-time or occasionally held clinics

Free Clinics

Free clinics are staff and resource costs that support non-healthcare organization sponsored community health centers and clinics, such as federally qualified community health centers. Hospital sponsored clinics should be reported under C. Mission Driven Health Services. Medical residency clinic costs should be reported under B1. Medical Education.

Mobile Units

A3. Health Care Support Services

Health care support services are given on a one-on-one basis to assist community members.

A4. Other Areas

Other areas include community benefit initiatives and programs where the recipient is not billed. Please list each program separately and should include only those programs that were not reported elsewhere in a different community benefit reporting category.

B. HEALTH PROFESSIONS EDUCATION

Maryland law defines a community benefit as an activity that is “intended to address community needs and priorities primarily through disease prevention and improvement of health status.” Additionally, offsetting revenue provided in the form of HSCRC-approved rates should not be reported in the “Offsetting Revenue” column.

B1. Physicians/Medical Students

Hospitals report expenses to provide a clinical setting for undergraduate training, internships/clerkships/residencies, residency education, including clinic costs, continuing medical education program, and access and use of medical library by physicians and medical students.

B2. Scholarships/Funding for Professional Education

Hospitals report negative margins for funding, including registrations, fees, travel, and incidental expenses for staff education that is linked to community services and health improvement.

B3. Nurses/nursing students

Hospitals report costs to provide a clinical setting for undergraduate training, training of nurse practitioners in special settings (emergency department, etc.), and access and use of medical library by nurses.

B4. Technicians

Hospitals report costs to provide a clinical setting for undergraduate training for lab and other technicians.

B5. Other Health Professional Education

Hospitals report costs to provide a clinical setting for undergraduate training for dietitians, physical therapists, pharmacists, and other health professionals. Hospitals also report the costs of training of health professionals in special settings (occupational health, outpatient facilities, etc.)

B6. Other

Hospitals count the costs to provide:

- Internships for pastoral education, social service, dietary and other professional/instructional internships
- Medical translator training
- Program costs associated with high school student “job shadowing” and mentoring projects
- Recruitment/retention of underrepresented minorities
- Scholarships to community members (not employees)
- Specialty in-service and videoconferencing programs made available to professionals in the community

C. MISSION DRIVEN HEALTH SERVICES

Mission driven health services are services provided to the community that were never expected to result in cash inflows but: 1) which the hospital undertakes as a direct result of its community or mission driven initiatives; or 2) would otherwise not be provided in the community if the hospital did not perform these services.

VHA and CHA provide further guidance in the Community Benefit Reporting guidelines that this category should not be viewed as a “catch-all” category for any service that operates at a loss. Care needs to be taken to ascertain whether the negative contribution is truly a community benefit. The Commission also provides that those initiatives geared towards increasing a hospital’s market share or that are a part of the hospital’s routine cost of doing business should not be included in a hospital’s community benefit report.

- As a reminder, Maryland law defines a community benefit as an activity that is “intended to address community needs and priorities primarily through disease prevention and improvement of health status.” The HSCRC also directs hospitals a checklist of questions developed by VHA and CHA to answer possible questions of whether an activity is appropriately considered a community benefit. Finally, hospitals are asked to include only items that generate a negative margin that have not been otherwise accounted for in a separate Community Benefit reporting section

D. RESEARCH

Research includes clinical and community health research, as well as studies on health care delivery.

D1. Clinical Research

Hospitals include such costs as:

- Unreimbursed studies on therapeutic protocols
- Evaluation of innovative treatments
- Research papers prepared by staff for professional journals

D2. Community Health Research

Includes:

- Studies on health issues for vulnerable persons
- Studies on community health, incidence rates of conditions for populations
- Research papers prepared by staff for professional journals

D3. Other

E. FINANCIAL CONTRIBUTIONS

This category includes funds and in-kind services donated to individuals and/or the community at large. In-kind services include hours donated by staff to the community while on health care organization work time, overhead expenses of space donated to not-for-profit community groups for meetings, etc., and donation of food, equipment and supplies.

E1. Cash Donations

Hospitals include:

- Contributions and/or matching funds provided to not-for-profit community organizations
- Contributions and/or matching funds provided to local governments

- Contributions for not-for-profit event sponsorship
- Contribution/fees paid for golf tournaments, concerts, galas, dinners and other charity events to not-for-profit organizations after subtracting value of participation by employees/organization
- Contributions provided to individuals for emergency assistance
- Scholarships to community members not specific to health care professions

E2. Grants

Hospitals include the costs of:

- Contributions and/or matching funds provided as a community grant to not-for-profit community organizations, projects, and initiatives. Include:
 - Program grants
 - Operating grants
 - Education and training grants
 - Matching grants
 - Event sponsorship
 - General contributions to nonprofit organizations/community groups

E3. In-Kind Donations

This subcategory includes:

- Meeting room overhead/space for not-for-profit organizations and community (e.g. coalitions, neighborhood associations, social service networks)
- Equipment and medical supplies
- Emergency medical care at a community event
- Costs of coordinating community events not sponsored by the health care organization, e.g., March of Dimes Walk America. (health care organization-sponsored community events are reported under G1, Community Benefit Operations)
- Provision of parking vouchers for patients and families in need
- Employee costs associated with board and community involvement on work time
- Food donations, including Meals on Wheels and donations to food shelters
- Gifts to community organizations and community members (not employees)
- Laundry services for community organizations
- Technical assistance, such as information technology, accounting, human resource process support, planning and marketing

E4. Cost of Fund-Raising for Community Programs

This category is meant to capture the costs of raising funds for community benefit programs, and not to capture all fundraising costs of the hospital.

F. COMMUNITY-BUILDING ACTIVITIES

Community-building activities include cash, in-kind donations, and budgeted expenditures for the development of community health programs and partnerships. When funds or donations are given directly to another organization, count in E, Donations.

F1. Physical Improvements/Housing

Includes:

- Community gardens
- Neighborhood improvement and revitalization projects

- Public works, lighting, tree planting, graffiti removal
- Housing rehabilitation, contributions to community-based assisted living, senior and low income housing projects.

F2. Economic Development

Hospitals include the costs of small business development and participation in economic development council or chamber of commerce in this subcategory.

F3. Support System Enhancements

Typical costs hospitals report in this subcategory include:

- Adopt-a-school efforts
- Child care for community residents with qualified need
- Mentoring programs
- Neighborhood systems or watch groups
- Disaster readiness
 - Costs as they relate to changes made to accommodate prospective disasters, including costs associated with lockdown capability, enhanced security measures, package handling, air machines and filters, water purification equipment, expanded mortuary facilities, facilities for personnel quarantine, expanded patient isolation facilities, shower facilities, and storage space for stockpiles
 - Costs of creating new or refurbishing existing decontamination facilities, such as water supply communications facility and equipment costs, equipment changes to ensure interoperability of communications systems; and additional disaster-related purchase of pagers, cell phones, mobile data terminals, and laptop computers specific to the communications component of the disaster plan. Include depreciation expenses.
 - Community disease surveillance and reporting infrastructure, updating laboratory diagnostic capability and associated training for laboratory personnel, informatics updating and patient tracking systems, detection instruments/monitors to detect radiation, and tests/assays for detection of chemical agents and toxic industrial materials, as well as tests for identification of biologic agents
 - Purchase of personal protective equipment (PPE) for stockpiles, including gloves, masks, gowns, and other items
 - Facility areas, waste water containment systems, decontamination tables, storage, shower systems, tents, soap, dispensers, and linen
 - Costs of stockpiling medical, surgical, and pharmaceutical supplies, including barriers, respirators, clothing, IV pumps and poles, IV fluids, suction machines, stretchers, wheelchairs, linens, bandages, and dressings
 - Costs associated with new or expanded training, task force participation, and drills
 - Mental health resource costs associated with training, community partnerships, and outreach planning

F4. Environmental Improvements

Efforts to reduce environmental hazards in the air, water, and ground, residential improvements (lead, radon programs), and community waste reduction and sharps disposal programs are typically expenses found in this subcategory.

F5. Leadership Development/Training for Community Members

Hospitals include the costs of:

- Conflict resolution
- Community leadership development
- Cultural skills training
- Language skills/development
- Life/civic skills training programs
- Medical interpreter training for community members

F6. Coalition Building

Hospital representation to community coalitions, collaborative partnerships with community groups to improve community health, community coalition meeting costs, visioning sessions, task force meetings, and costs for task force specific projects and initiatives are specific examples of appropriate coalition building costs.

F7. Community Health Improvement Advocacy

Hospitals include the costs of local, state, and/or national advocacy for community members and groups relative to policies and funding to improve access to health care, public health, transportation, and housing.

F8. Workforce Enhancement

Hospitals include the costs of:

- Recruitment of physicians and other health professionals for federally medical underserved areas
- Recruitment of underrepresented minorities
- Job creation and training programs
- Participation in community workforce boards, workforce partnerships and welfare-to-work initiatives
- Partnerships with community colleges and universities to address the health care workforce shortage
- Workforce development programs that benefit the community, such as English as a Second Language (ESL)
- School-based programs on health care careers
- Community programs that drive entry into health careers and nursing practice
- Community-based career mentoring and development support

F9. Other

G. COMMUNITY BENEFIT OPERATIONS

Community benefit operations include costs associated with dedicated staff, community health needs and/or assets assessment, and other costs associated with community benefit strategy and operations.

H. CHARITY CARE

Charity care is:

- Free or discounted health and health-related services provided to persons who cannot afford to pay
- Care provided to uninsured, low-income patients who are not expected to pay all or part of a bill, or who are able to pay only a portion using an income-related fee schedule
- Billed health care services that were never expected to result in cash inflows

- The unreimbursed cost to the health system for providing free or discounted care to persons who cannot afford to pay and who are not eligible for public programs

Charity care results from a provider's policy to provide health care services free of charge, or on a discounted fee schedule, to individuals who meet certain financial criteria. Generally, a bill must be generated and recorded and the patient must meet the organization's criteria for charity care, and demonstrate an inability to pay. Charity care does not include bad debt. Bad debt is uncollectible charges excluding contractual adjustments, arising from the failure to pay by patients whose health care has not been classified as charity care.

J. FOUNDATION-FUNDED COMMUNITY BENEFIT

A foundation is a separate not-for-profit organization affiliated with the health care organization that conducts fund-raising. A foundation can support health care organization operations and/or may fund community health improvement programs, activities, and research.

Attachment IV – Hospital Rate Support for Community Benefit Programs

Nurse Support Program (NSP)

The following chart details awards granted to Maryland hospitals to fund Nursing Support Program to for initiatives to increase the recruitment and retention of nurses in Maryland hospitals in FY 2005:

Hospital	Grant Awarded
Anne Arundel Medical Center	\$158,350
Atlantic General Hospital	\$35,026
Bon Secours Hospital	\$81,428
Calvert Memorial Hospital	\$61,409
Carroll County General Hospital	\$104,887
Chester River Hospital Center	\$39,988
Civista Medical Center	\$65,499
Doctors Community Hospital	\$117,663
Dorchester General Hospital	\$36,401
Franklin Square Hospital	\$240,735
Frederick Memorial Hospital	\$153,881
Garrett Memorial Hospital	\$25,981
Greater Baltimore Medical Center	\$265,816
Good Samaritan Hospital	\$168,020
Harbor Hospital	\$112,668
Harford Memorial Hospital	\$52,225
Holy Cross Hospital	\$229,248
Howard County General Hospital	\$125,884
Johns Hopkins Bayview Medical Center	\$305,984
Johns Hopkins	\$620,551
Kernan Hospital	\$57,685
Laurel Regional Hospital	\$76,426
Maryland General Hospital	\$133,093
Memorial at Easton	\$89,025
Memorial of Cumberland	\$81,360
Mercy Medical Center	\$206,891
Montgomery General Hospital	\$87,224
North Arundel Hospital	\$178,017
Northwest Hospital	\$133,457
Peninsula Regional Medical Center	\$219,723
Prince George's Medical Center	\$203,202
Sacred Heart Hospital	\$89,272
Saint Agnes Hospital	\$228,480
Saint Mary's Hospital	\$62,402
Saint Joseph's Hospital	\$245,634
Sinai Hospital	\$380,307
Southern Maryland Hospital	\$149,739
Suburban Hospital	\$146,985
University of Maryland Medical Center	\$508,386
University of Maryland Cancer Center	\$50,509
University of Maryland Shock Trauma	\$130,495
Union Memorial Hospital	\$245,700
Union Hospital of Cecil	\$76,740

Upper Chesapeake Medical Center	\$92,077
Washington Adventist Hospital	\$205,740
Washington County Hospital	\$147,650
Total Grants Awarded	\$7,227,863

Uncompensated Care

The HSCRC includes amount in hospital rates for uncompensated care; this includes both charity care (eligible for inclusion as a community benefit by Maryland hospitals in their CBRs) and bad debt (not considered a community benefit). This chart, therefore, illustrates the total amount a hospital received for both charity care and bad debt in FY 2005.

Hospital	Uncompensated Care in Rates
Anne Arundel Medical Center	\$11,447,886
Atlantic General	\$2,781,140
Bon Secours	\$9,955,143
Calvert Memorial	\$4,526,805
Carroll County General	\$6,713,567
Chester River Hospital Center	\$4,012,267
Civista Medical Center	\$4,887,481
Doctors	\$10,572,590
Dorchester General	\$3,039,042
Fort Washington Medical Center	\$3,343,901
Franklin Square	\$22,455,891
Frederick Memorial Hospital	\$9,826,463
Garrett County	\$1,844,447
Good Samaritan	\$16,312,643
Greater Baltimore Medical Center	\$8,620,891
Harbor Hospital Center	\$13,917,233
Harford Memorial	\$5,490,475
Holy Cross	\$19,207,689
Howard County	\$9,234,801
Kernan	\$4,324,896
Johns Hopkins Bayview	\$36,819,810
Johns Hopkins	\$67,061,461
Laurel Regional	\$12,166,147
Maryland General	\$13,437,466
McCready	\$1,244,800
Memorial at Easton	\$8,480,359
Mercy Medical Center	\$23,424,381
Montgomery General	\$5,724,014
North Arundel	\$13,355,457
Northwest	\$10,969,694
Peninsula Regional Medical Center	\$15,525,873
Prince Georges	\$35,271,356
Sacred Heart	\$3,819,795
Shady Grove Adventist	\$12,130,876
Sinai	\$34,423,284
Southern Maryland Hospital	\$10,056,323
St. Agnes Hospital	\$20,174,529

St. Josephs	\$8,922,635
St. Marys	\$3,904,293
Suburban	\$6,523,007
Memorial of Cumberland	\$3,446,573
Union Hospital	\$5,426,317
Union Memorial Hospital	\$25,291,369
Univ. of Maryland Medical System	\$59,978,241
Upper Chesapeake Medical Center	\$6,991,028
Washington Adventist	\$12,437,052
Washington County Hospital	\$12,380,269
TOTAL	\$641,901,660

Graduate Medical Education

The Commission utilizes an annual hospital intern and resident count to assist in quantifying the direct and indirect costs of medical education in physician training programs, and recognizes only the interns and residents included on the survey up the hospital's cap. Any resident and intern costs above the hospital's recognized cap, therefore, would not be funded through hospital rates. Further, the amounts are differentiated by direct and indirect costs. Direct medical education costs are those directly incurred in the operation of teaching activities and consist of salaries and fringe benefits of residents and interns, faculty supervisory expenses, and allocated overhead. Indirect medical education costs, by contrast, are generally described as those additional costs incurred as a result of the teaching program (e.g., increased patient severity associated with teaching programs and inefficiencies, such as ordering extra tests or the extra costs of supervision).

The following chart illustrates the amount in hospital rates for graduate medical education for FY 2005:

HOSPITAL	IME	DME	TOTAL
Anne Arundel Medical Center	\$0	\$0	\$0
Atlantic General Hospital	\$0	\$0	\$0
Bon Secours Hospital	\$0	\$0	\$0
Calvert Memorial Hospital	\$0	\$0	\$0
Carroll County General Hospital	\$0	\$0	\$0
Chester River Hospital Center	\$0	\$0	\$0
Civista Medical Center	\$0	\$0	\$0
Doctors Community Hospital	\$0	\$0	\$0
Dorchester General Hospital	\$0	\$0	\$0
Fort Washington Medical Center	\$0	\$0	\$0
Franklin Square Hospital Center	\$20,278,325	\$3,238,137	\$23,516,462
Frederick Memorial Hospital	\$0	\$0	\$0
Garrett County Memorial Hospital	\$0	\$0	\$0
GBMC	\$13,624,555	\$2,076,991	\$15,701,546
Good Samaritan Hospital	\$7,572,059	\$1,701,678	\$9,273,737
Harbor Hospital Center	\$9,405,394	\$1,574,823	\$10,980,217
Harford Memorial Hospital	\$0	\$0	\$0
Holy Cross Hospital	\$7,802,278	\$1,791,759	\$9,594,037

Howard County General Hospital	\$0	\$0	\$0
James Lawrence Kernan Hospital	\$1,019,317	\$349,790	\$1,369,107
Johns Hopkins Bayview Medical	\$24,342,877	\$4,055,852	\$28,398,729
